

Passing the Structures Exam

Agenda

1. How to take the test. A process for how to tackle the questions.
2. A study of gravity systems.
3. A study of lateral systems.
4. The 3 critical analytical tools to know and when to apply them.
5. Sample Questions.

Bio

Mr. Barker is a registered civil and structural engineer with over 24 years of experience in building design. He is registered in various states and has been involved in projects across the US and around the world including South America and Europe. He has extensive experience in highly complex buildings and innovative design techniques and is a recognized authority on steel frame connection design.
